

Frequently Asked Questions:

1. Why can I not get this file to work on my PC?

- *ForeFlight on the PC does not allow KML files to be used.*

2. Will Garmin Pilot reporting points be provided?

- *Yes, once the Beta period is complete the Reporting Points will be provided in a file format that Garmin Pilot can use. However, currently Garmin does not allow for lines to be used. This means the borders, approaches and airports icons will not be included. If/when Garmin Pilot supports KML files they will be created and provided on the AFTW site.*

3. Will the site still have the maps that I can download?

- *Yes*

4. What criteria did you use to make these points?

- *Please use this link (<http://aftw.org/wp/wp-content/uploads/2018/04/AFTW-KML-Notes.pdf>) to read about how we came up with the Reporting Points.*

5. Can I get points added?

- *Yes. Please submit Reporting Points with the following information.*
 - Location, coordinates or direction and distance away from a town, Reporting Point, or some other recognizable point.*
 - Name of Point*
 - Reason for the Point*
