SUBJECT: Proposal to establish a PLA on airport property

Mr. Wilkie, thank you for reviewing my proposal to land parachutes at the Casa Grande Municipal Airport. I appreciate the time and consideration that you put into our proposal. I am also happy to inform you that there are solutions to the small amount of objections the city has with the proposal.

I have addressed the solutions in the order that you presented them:

- I have changed the location of the proposed PLA in the attached, revised proposal to address your concern. The new PLA is on the South side of the runway and the Taxiway. Phoenix Area Skydiving is in favor of working with the airport to make the safest environment possible for all users of the airport.
- We are willing to assist in finding insurance for the airport. Please reply with the name of your insurance company and I will start the process immediately.
- Jet traffic, while it may not appreciate skydiving, will not stop coming to the Casa Grande Airport because of the skydiving. Jets encounter skydiving at many airports around the country and they fly where their owners tell them to fly. Additionally, Phoenix Area Skydiving will work with the airport to minimize any negative impact that the skydiving has on any future jet traffic.

Thank you again, Mr. Wilkie, for your anticipated prompt response to our proposal. I look forward to a long and mutually beneficial relationship with the airport.

Respectfully,

Luther Kurtz
Phoenix Area Skydiving
